CAREER SUMMARY

Director Product Manager, Wealth Management — UBS Business Solutions AG

2023 – Present

- Designed AI adoption metrics and behavioural analytics across Wealth Management employees to identify where AI-first ways of working were succeeding or stalling. Translated adoption insights into product enhancements and enterprise enablement priorities for senior leadership.
- Led the WindDown Interdependency Stream for enterprise application rationalisation using graph analytics and AI techniques (Louvain, SCC, HDBSCAN, Graph Neural Networks) across approximately 22,000 application relationships. Reduced structural complexity by 53.1% and produced business cases supporting the retirement of more than 2,000 applications, with savings measured in \$10M.
- Designed a custom risk assessment model for application decommissioning combining application complexity, business criticality, data sensitivity, compliance requirements and historical incidents; integrated the resulting risk score into a clustering model to minimise decoupling risk and cost.
- Acted as Agile Product Owner within Agile@UBS crews, driving roadmap prioritisation, product decisions and OKR alignment across cross-functional teams.
- Chapter Lead / Line Manager of an Engineering team.

Vice President, Product & Service Manager — Credit Suisse AG

2019 – 2023

- Owned product strategy, lifecycle management, vulnerability management, licensing, billing and vendor relationships across multiple products and platforms.
- Managed enterprise contracts exceeding USD 10M annually, supporting more than 750 internal customers and 25,000 platform deployments.
- Led a large-scale digital transformation program, migrating more than 350 enterprise applications and 35,000 deployments to an open-source platform, delivering over USD 25M in cost avoidance.
- Built executive alignment across more than 700 stakeholders.
- Served as SOX Key Process Control Owner with zero PwC/EY audit findings.
- Applied AI/ML techniques, including neural forecasting models and graph-based clustering, to improve forecasting and operational decision-making.

Assistant Vice President / Vice President, Product Manager — Credit Suisse AG

2013 – 2019

- Managed product strategy, lifecycle, licensing, chargeback, vulnerability management and vendor relationships.
- Partnered with business and technology stakeholders to design enterprise reporting, inventory and chargeback solutions.
- Developed AI/ML models for time-series forecasting, stakeholder clustering and vulnerability risk analysis.
- Designed a data lakehouse including ingestion and transformation pipelines for enterprise inventory data.
- Managed a multi-million CHF FinOps budget, delivering USD 5M in recurring annual cost avoidance while reducing vulnerability exposure from 80% to below 10% and maintaining 99.9% platform availability.
- Chapter Lead / Line Manager of an Engineering team.

Assistant Vice President, Senior Architect – Java EE Platform — Credit Suisse Financial Services

2004 – 2013

- Led architecture and technical strategy for Credit Suisse's global Java Application Server platform.
- Provided architecture consulting for Online Banking, Trading and Private Banking systems.
- Defined enterprise Java technology standards.
- Managed vendor relationships and contracts valued at approximately USD 12M annually.
- Line Manager of an Engineering Consulting team.

Java Platform Consultant & Architect — Credit Suisse Private Banking

2003 – 2004

- Provided architecture consulting and mentoring throughout the software delivery lifecycle.
- Designed governance processes for application onboarding, capacity planning and resource management.
- Successfully onboarded approximately 100 enterprise applications across multiple business divisions and regions.
- Line Manager of an Engineering team.

Senior Java Software Engineer & Architect — Credit Suisse Private Banking

2001 – 2003

- Owned Java and Java EE frameworks within the Private Banking division and served as technical advisor to development teams.
- Line Manager of an Engineering team.

Senior Java Consultant — GFT Technologies – Germany / Switzerland

1998 – 2001

- Delivered enterprise Java consulting engagements for Deutsche Post, Deutsche Bank, Swiss Post and the Swiss Federal Tax Administration (ESTV).

Freelance Java & Microsoft Engineer — Independent

1995 – 1998

- Delivered software engineering and architecture projects for financial institutions, public-sector organisations and private clients.

EDUCATION

Master of Engineering (MS) in Microelectronic Engineering, Science and Technology — Università degli Studi di Roma “La Sapienza”
