CARLO DE ROSSI

ENTERPRISE TECHNOLOGY & AI TRANSFORMATION LEADER

Product Leadership | Business–IT Alignment | Technology Governance

Zürich, Switzerland | contacts@carloderossi.com | www.carloderossi.com | linkedin.com/in/carloderossi

EXECUTIVE PROFILE

Senior technology and transformation leader with 25+ years of experience translating complex technology into measurable business value within global financial institutions. Extensive track record leading enterprise product and platform transformations, modernizing business-critical technology, reducing operational complexity and delivering multimillion-dollar cost efficiencies.

Combines executive product leadership and financial accountability with deep technical expertise in enterprise architecture, AI/ML, data analytics and digital platforms. Experienced aligning business and technology stakeholders, leading engineering and operations teams, managing strategic vendors and operating in highly regulated environments.

Leadership philosophy: Accountable for outcomes, not just outputs. Technology creates value through better decisions, lower complexity and risk, and sustainable business capabilities.

SELECTED BUSINESS IMPACT

- USD 25M+ cost avoidance: Led migration of 350+ enterprise applications and 35,000 platform deployments to an open-source platform.
- 53.1% complexity reduction: Led graph-analytics-driven rationalization across ~22,000 application relationships, supporting business cases for retirement of 2,000+ applications and identifying savings measured in tens of millions of dollars.
- USD 5M recurring annual cost avoidance: Managed a multimillion-CHF platform budget, reduced vulnerability exposure from 80% to below 10%, and sustained 99.9% availability.
- Enterprise stakeholder alignment: Built alignment across 700+ stakeholders; managed platforms serving 750+ internal customers.
- Governance and control: SOX Key Process Control ownership with zero PwC/EY audit findings.

CORE LEADERSHIP CAPABILITIES

Strategy & Transformation: Enterprise Technology Strategy · Digital & AI Transformation · Technology Modernization · Business–IT Alignment · Business Cases · Organizational Change

Product & Service Leadership: Enterprise Product Management · Product Strategy & Roadmaps · Agile Product Ownership · Service Management · Process Optimization

Governance & Financial Accountability: Technology Governance · Risk & Compliance · Operational Resilience · FinOps · Vendor & Contract Management · Executive Stakeholders

Technology & Innovation: Applied AI & Machine Learning · Graph Analytics · Enterprise Architecture · Cloud Platforms · Data Governance · Automation · Responsible AI

PROFESSIONAL EXPERIENCE

UBS BUSINESS SOLUTIONS AG | Director, Product Manager — Wealth Management | 2023–Present

Leading product and transformation initiatives combining AI-driven analytics, application rationalization, product governance and cross-functional leadership.

- Led the WindDown Interdependency Stream, applying graph analytics and ML across ~22,000 application relationships; reduced structural complexity by 53.1% and developed business cases for the potential retirement of 2,000+ applications.
- Developed a decommissioning risk model combining business criticality, technical complexity, data sensitivity, compliance requirements and historical incidents for safer, more cost-effective transformation.
- Designed AI adoption and behavioral analytics in Wealth Management, translating findings into product enhancements and enterprise enablement priorities for senior leadership.

- Acted as Agile Product Owner within Agile@UBS, aligning roadmaps, priorities and objectives with business needs; served as Chapter Lead and Line Manager of engineering and operations teams.

CREDIT SUISSE AG | Vice President, Product & Service Manager | 2019–2023

- Led platform modernization, migrating 350+ enterprise applications and 35,000 deployments to open-source technology, delivering over USD 25M in cost avoidance.
- Managed enterprise technology contracts exceeding USD 12M, with products serving 750+ internal customers and 25,000 platform deployments; aligned 700+ stakeholders.
- Owned product and service strategy, lifecycle, licensing, financial chargeback, vulnerability management and strategic vendor relationships.
- Applied machine learning and graph analytics to forecasting and operational decisions; served as SOX Key Process Control Owner with zero PwC/EY findings.

CREDIT SUISSE AG | AVP / VP, Product Manager | 2013–2019

- Managed a multimillion-CHF FinOps budget and delivered USD 5M in recurring annual cost avoidance.
- Reduced vulnerability exposure from 80% to below 10% while maintaining 99.9% platform availability.
- Directed lifecycle, licensing, vendor relationships, chargeback and technology risk; built enterprise inventory, reporting and data lakehouse capabilities.
- Applied AI/ML to forecasting, clustering and risk analysis; served as Chapter Lead and Line Manager for an engineering team.

CREDIT SUISSE FINANCIAL SERVICES | AVP, Senior Architect — Enterprise Java Platform | 2004–2013

- Led global application server platform architecture and enterprise Java standards for business-critical environments.
- Advised teams supporting Online Banking, Trading and Private Banking; managed vendor relationships and contracts across a USD 20M portfolio.
- Led an engineering consulting team, providing architectural guidance and capability development.

CREDIT SUISSE PRIVATE BANKING | Java Platform Consultant & Architect | 2003–2004

- Designed bank-wide enterprise Java platform capabilities and onboarding, capacity and resource governance; supported ~100 enterprise application onboardings; led an engineering team.

CREDIT SUISSE PRIVATE BANKING | Senior Java Software Engineer & Architect | 2001–2003

- Designed enterprise Java application platform capabilities, owned Java/Java EE frameworks, advised delivery teams and led an engineering team.

GFT TECHNOLOGIES | Senior Java Consultant | 1998–2001

- Delivered consulting engagements for Deutsche Bank, Deutsche Post, Swiss Post and the Swiss Federal Tax Administration.

INDEPENDENT CONSULTANT | Software Engineer & Technology Consultant | 1995–1998

- Delivered Java and Microsoft engineering and architecture projects for financial institutions, public-sector organizations and private clients.
